SAN JOSE MUSEUMS

San Jose is the birthplace of innovation and continues to thrive with over 6,000 technology companies and more patents than any other city on earth. Inventors, entrepreneurs, engineers, artists, creators, visionaries, designers, and business professionals flock to here to be part of this dynamic environment. San Jose also has a rich and diverse history starting with the original Indian inhabitants, to the Spanish explorers looking for treasure, to the immigrants who worked the land and farmed, and now people with imagination and vision who are designing the future.

San Jose has many wonderful museums, from high tech science to modern art, to ancient artifacts and mummies. There's a San Jose museum waiting to be enjoyed and explored.
