ABOUT SANTA CRUZ

Santa Cruz is known for its moderate climate, natural beauty, educational institutions, and alternative community lifestyles. It is home to University of California, Santa Cruz, a premier research institution and educational hub, as well as the Santa Cruz Beach Boardwalk, an oceanfront amusement park.

The present-day site of Santa Cruz was the location of an American Indian settlement since ancient times. It was also one of the earliest settlements of the Spanish during the exploration of Alta California in the later part of the 18th century, including a California Mission, Mission Santa Cruz. During the late 19th century, after California became part of the United States, Santa Cruz became widely popular for its idyllic beaches and coastal redwood forests, establishing itself as a resort community.
